Since social hierarchy seems to help determine how pleasurable sex is for these macaques, it might be that these monkeys' orgasms are actually an adaptation to influence mate selection.

Long-term studies of bottlenose dolphins have shown that both sexes and a wide range of ages participate in sexual activities year-round, not just during the mating season.

Females are at the center of the community, so they might reconcile differences through sexual behaviors, which works to ease the tension in certain situations, like in conflicts over food availability.
